(54) Title: METHODS AND APPARATUS FOR REMOTE AUTHENTICATION IN A SERVER-BASED COMPUTING SYSTEM

(57) Abstract: A method and apparatus for remotely authenticating a user to a server in a server-based computing environment. A client computing device receives user credentials and generates user authentication data based upon the received credentials. The client computing device transmits the generated user authentication data to a server computing device. The server computing device authenticates the user responsive to the transmitted user authentication data.
