INFOB3TC
Correcting the first lab exercise

Johan Jeuring

Deadline: Tuesday, 14 December 2010

Preliminaries

This document supports grading the first lab exercise. The zip file in which you got his document contains:

- This file.

- Two example solutions.

- An examination directory containing instructions for formatting and checking your reviews.

All of you have to correct your own work, and the solution of another group of students. The assistants will randomly correct some of the submissions. If the grades for your own work do not differ by more than 1, we will give you the highest grade. If they differ more than 1, an assistant will look at the work, and determine the grade.

In this document we will give two possible solutions to the first lab, against which you can compare the solutions you have to grade.

There are a couple of general observations about grading:

- Often, there are many possible solutions. We have provided two good solutions, please have a look at them to find out what a good solution looks like.

- There are even more ways to wrongly solve the lab.

- Although we tried to avoid it, the provided solutions might contain mistakes. Please notify us if you find a mistake.

- At each task I specify how many points you can obtain for a good solution. The total amount of points you can get (including points for the bonus exercises) is 155. Excluding the bonus exercises the total amount of pointsyou can get is 90. The final grade is $1 + totalpoints/10'min'10$.

- Hand in your corrections in the format described in the Manual in the Examination directory. Check that you've done this correctly by following the instructions in the Manual. This is **important**: if you use this format, we can automatically process the corrections.

1 (10 points). •

2 (15 points). •

3 (5 points). •

4 (10 points). •

5 (5 points). •

6 (5 points). •

7 (5 points). •

8 (15 points). •

9 (5 points). •

10 (5 points). •

11 (10 points). •

12 (5 points). •

13 (10 points). •

14 (10 points). •

15 (15 points). •

16 (10 points). •

17 (15 points). •
